

Corporate Membership Program

Corporate Membership Program

The Neurocritical Care Foundation serves as the philanthropic arm of the Neurocritical Care Society. A 501(c) (3) not-for-profit organization, our goal is to raise annual and capital gifts and grants from a vast and diverse family of supporters: individuals, foundations and corporations, joined in their commitment to our mission to further neurocritical care-related research and education.

We welcome companies who share our mission to cure coma and other life-threatening neurological disease to join our family of supporters to further opportunities for research and education through charitable gifts and grants.

The NCCF Corporate Membership Program provides opportunities to network with the leaders and influencers who create and advance the art and science of neurocritical care. Member organizations can be seen as aligning their goals and objectives with that of NCCF: those of improving both treatments and outcomes of and for the neurocritical care patients of tomorrow and today.

All corporate contributions to the Neurocritical Care Foundation will be allocated at the discretion of the Board of Trustees in order to fulfill the Foundation's mission. In some cases, the Foundation may determine to work in collaboration with foundation and corporate donors in restricted support for an initiative deemed to be of sufficient value and in keeping with the Foundation's priorities. All donors of restricted support of any kind are required to join the corporate membership program at any level.

Membership Benefits

	PRESIDENT'S CIRCLE \$100,000	PLATINUM \$50,000	GOLD \$25,000	SILVER \$10,000	BRONZE \$5,000 AND UP
Acknowledgement on NCCF website	✓	✓	✓	✓	✓

Mid-Career Investigator Award II	Principle Investigators with at least five years of experience.	<i>\$250,00 for two years</i>
Signature Program Award	Neurocritical Care Society	<i>\$500,00 for two years</i>

Curing Coma® Database

The mission and goal of all Curing Coma® endeavors is to promote the recovery of consciousness through early intervention and long-term support. The first tool that a Curing Coma® initiative requires is a comprehensive, consolidated data base of patient information. This will allow for in-depth analysis, and the ability to define and share best practice standards for care.

CURING COMA® DATABASE OBJECTIVES

- Capture data from over 100 countries
- Test hypotheses in large study samples that could never before be tested
- Understand the breadth and depth of the impact coma has on the world
- Provide quality feedback to hospitals and providers to improve care now and in the future
- Engage medical providers who want to help but do not know how

BENEFITS TO PATIENTS

- Promoting early recovery of coma
- Accelerating discovery science
- Refining coma intervention strategies
- Providing a repository for which current and future questions can be asked

BENEFIT TO NEUROCRITICAL CARE PROFESSIONALS

- Creating a platform for international collaboration on the discovery science of coma
- Streamlining care & intervention practices

The Curing Coma® database will provide foundations and corporations aligned with neurocritical care the opportunity to create a lasting impact on an underrepresented group. The initial phase of the creation of the database will cost \$250K. To learn more about how you can contribute and make this essential tool in the fight against coma possible, please address all inquiries to Paul Nyquist, M.D. and the NCCF Board at info@neurocriticalcarefoundation.org.
